To,
Maven Vista Team,

We are happy to mention that our experience with VENDX Auction platform, which is integrated with our RFP process has been very satisfactory. Due to seamless transfer of our detailed landed cost formulas to Auction VENDX Auction Engine is assisting us to have every single bid from each vendor with full break up of our total cost of ownership. Besides once the auction is completed we can transfer the bids received during the auction back into detailed landed cost break up without any human intervention leading to highest standard of compliance.

I wish to also mention here about the exceptional support we have received for faster adoption of VENDX RFQ & Auction engine among the users. We have found the UI highly user friendly and intuitive. In all we would only reflect that Maven Vista offers one of the best experience of a SW vendor with comprehensive functionalities of the VENDX SW and excellent services standards of their support & implementation team.

We wish Maven Vista team very best and will strongly recommend VENDX to companies who are looking for optimization of their procurement decision making process and wanting to achieve superior compliance.
