

Information Security Policy

The assured business continuity of Mavenvista is dependent upon demonstrating to our customers and our Stakeholders that the security of information assets, such as company and client information, is not compromised at any point of time.

Information is our most important asset. Without it we would not be able to function effectively as an organization. Because of its importance, we recognize that our organization must protect its information assets. We will do this in ways that are appropriate and cost effective. This will help enable us to fulfil our mission, as well as protect our reputation and ensure that a high-quality service can continue to be offered to our customers.

It is Organizational overall responsibility to ensure that all information assets are protected and Confidentiality, Integrity and Availability of information and processing methods are maintained.

This policy will, therefore, support and strengthen the implementation of our Information Security Management System.

- *We will use all reasonable, appropriate, practical and effective security measures to protect our important processes and assets in order to achieve our security objectives.*
- *We will continually examine ways in which we can improve our use of security measures to protect and enhance our business.*
- *As a responsible organization, we will protect and manage our information assets to enable us to meet our contractual, legislative, privacy and ethical responsibilities.*
- *All employees shall ensure the security of information assets by protecting them from unauthorized use, modification, disclosure or destruction, whether accidental or intentional.*

Quality Policy

It will be our Constant Endeavour to deliver our products and services to meet and exceed customer expectations of Quality Delivery & Cost.

We will strive to achieve Customer Satisfaction and Consistent Growth by Continual Improvement.
